Meet Your Trainers

Rajiv Mathew is more than just a tech trainer - he's a business strategist with 19+ years of experience helping C-suite executives leverage AI for transformation, focusing on ROI rather than technical jargon. He was the program head for Oracle's startup ecosystem and AI innovation program across JAPAC. Unlike traditional training where only tools are taught, Rajiv focuses on enterprise transformation—bridging business objectives with technology to drive measurable outcomes. His "business-first" approach equips professionals to future-proof their careers against AI-driven disruptions and navigate their journey without getting lost in technical complexity.

Verghese Thirumala, Founder & Managing Director of Maxitulin, has led the AI-powered physical security company since its establishment in Kuala Lumpur in 1997 with business presence in SE Asia. With 30 years of expertise, he has overseen operations across Malaysia, India, and Saudi Arabia, playing a key role in advancing AI-driven security technologies. His work spans Southeast Asia and the Middle East, offering deep insights into regional professional job challenges and requirements.
