

INTEGRATED SECURITY MANAGEMENT FOR COMMERCIAL & INDUSTRIAL FACILITIES

2 Day Training

Date: April - 21 Tues & 22 Wed 2026

Venue: Penang, Malaysia

A Competency-Based Security Training Program by **MAXSECON**

From Threats to Confidence: Mastering Security Management

Step into the future of security management with MAXSECON's immersive 2-day training program. Designed for professionals across commercial and industrial sectors, this course blends proven strategies with cutting-edge AI technologies to equip you with the skills to anticipate, prevent, and respond to evolving threats. Strengthen your organization's resilience with a comprehensive, hands-on training program designed to equip professionals with the skills needed to safeguard commercial and industrial facilities against evolving threats.

Program Overview

This 2-day intensive course blends theory, case studies, and practical exercises to build competencies in intelligence, risk management, technical security, and emergency response. Participants will gain actionable insights into modern security practices, including the integration of AI-powered technologies.

Foundations of Security Management

- Module 1: Intelligence & Threat Assessment Learn to evaluate threats, conduct business diligence, and leverage community support programs.
- Module 2: Risk Management Master risk assessment and mitigation strategies to protect assets and operations.
- Module 3: Incident Investigation & Analysis Explore investigative techniques, background checks, and awareness training.
- Module 4: Information Protection Safeguard sensitive data with information security, cyber defence, and counter-surveillance practices.

Advanced Security Practices

- Module 5: Technical Security Dive into integrated control systems, surveillance, alarms, and emerging detection technologies.
- Module 6: Operations Protection Secure facilities, manage guard forces, and protect products during production and transport.
- Module 7: Emergency Procedures Develop and practice emergency response protocols with simulation exercises.
- Module 8: New AI Physical Security Technologies Discover how deep learning and AI are transforming surveillance and physical security.

Key Features

- Expert-led lectures and interactive discussions
- Real-world case studies and simulation exercises
- Exposure to cutting-edge AI security technologies
- Certificate of completion awarded

Who Should Attend

- Security managers and supervisors
- Facility and operations managers
- Risk and compliance officers
- Professionals seeking to upgrade their security competencies

Outcome

By the end of this program, participants will be equipped with the knowledge, tools, and confidence to implement integrated security strategies that protect people, assets, and operations in today's complex threat landscape.

Meet your Trainers

Andrin Raj is the SEA Regional Director for the International Association for Counterterrorism and Security Professionals, Southeast Asia and the Director for the Nordic Counter Terrorism Network, based in Finland.
