

Is Your Security Team Training for Yesterday's Threats or Tomorrow's Reality?

There are individuals in this world training to defeat you! Are you prepared?

CATP

CERTIFIED ANTI-TERRORISM PROFESSIONAL

MAXSECON

3 Days - Oct 20 to 22, 2026 Venue: Kuala Lumpur, Malaysia
HRDC Claimable

Why Every Organisation Should Upskill Its Security Team

Today's security landscape extends far beyond **traditional security incidents**. Organisations must be prepared for terrorism, hostile surveillance, insider threats, lone-actor attacks, drone threats, and other emerging risks. As the first line of defence, security professionals who can recognise threats early play a critical role in preventing incidents before they escalate.

While organisations continue to invest in AI surveillance and other security technologies, their greatest asset remains their people. Technology can detect anomalies, but only trained professionals can assess threats, make critical decisions, and respond effectively during a crisis.

The **Certified Anti-Terrorism Professional (CATP)** programme equips security professionals with internationally recognised counter-terrorism knowledge and practical skills to strengthen threat recognition, emergency preparedness, and organisational resilience. Successful participants will earn the **CATP** certification issued by the **International Association for Counterterrorism and Security Professionals (IACSP)**.

Investing in your security team is investing in your organisation's resilience. In today's evolving threat environment, CATP is more than a certification, it is a strategic investment in protecting your people, assets, operations, reputation, and business continuity.

Why Organisations Should Invest in CATP Training

Detect Threats Before They Become Incidents

Learn to identify hostile surveillance, suspicious behaviours, pre-attack indicators, radicalisation patterns, and emerging terrorist tactics before an attack occurs

Strengthen Emergency Preparedness and Crisis Response

Equip security personnel with structured response strategies to minimise casualties, coordinate effectively with emergency responders, and protect critical facilities during security incidents.

Enhance Organisational Resilience

Improve business continuity, crisis management, and operational resilience by strengthening preparedness against intentional attacks and high-impact security events.

Address Modern Security Threats, Understand evolving threats including:

Lone-actor attacks, Insider threats, Improvised Explosive Devices (IEDs), Vehicle-as-a-weapon attacks, Drone threats, Critical infrastructure attacks and AI-enabled security technologies for proactive threat detection

Protect Corporate Reputation and Public Confidence

Prepared organisations inspire confidence among employees, customers, business partners, regulators, and stakeholders by demonstrating a proactive commitment to safety and security.

Develop Highly Competent Security Professionals

The internationally recognised CATP certification enhances professional credibility, decision-making capability, leadership confidence, and operational effectiveness.

Programme Overview

This intensive three-day programme provides participants with comprehensive knowledge of:

- Global terrorism landscape and evolving threats
- Terrorist organisations, structures and ideologies
- Terrorist operational planning and attack methodologies
- Suicide terrorism and Improvised Explosive Devices (IEDs)
- Intelligence gathering and threat assessment
- Behavioural threat recognition and hostile surveillance detection
- Physical security and counter-terrorism strategies
- Facility protection and emergency response planning

The CATP curriculum has been utilised in professional counter-terrorism training in Indonesia, Malaysia, Europe and West Africa

Learning Outcomes

Upon completion, participants will be able to:

- Understand terrorist organisations, motivations and operational structures.
- Recognise behavioural indicators and pre-attack warning signs.
- Analyse terrorism-related risks affecting organisations and critical facilities.
- Conduct threat assessments and recommend appropriate mitigation measures.
- Develop practical emergency response and physical security plans.
- Improve organisational preparedness, resilience and crisis response capability.
- Apply internationally recognised counter-terrorism principles in corporate security operations.

Assessment & Certification

Participants will be assessed through:

- Written Examination
- Threat Scenario Discussions
- Practical Case Study Analysis
- Classroom Participation

Successful participants will receive the internationally recognised Certified Anti-Terrorism Professional (CATP) certification issued by the International Association for Counterterrorism and Security Professionals (IACSP), USA.

Industries

This programme is highly recommended for organisations operating in:

- Critical Infrastructure
- Manufacturing
- Logistics & Warehousing
- Transportation (Air, Sea & Rail)
- Financial Institutions
- Data Centres
- Healthcare & Hospitals
- Utilities
- Telecommunications
- Oil & Gas
- Property Management
- Hotels & Shopping Malls
- Government Agencies
- Higher Education Institutions

Target Participants

- Corporate Security Directors and Managers
- Heads of Security
- Corporate Risk Managers
- Facility and Operations Managers
- Hotel & Shopping Mall Security Managers
- Aviation Security (AVSEC) Personnel
- Maritime & Port Security Personnel
- Public Transportation Security
- Private Security Companies (PMSC)
- Critical Infrastructure Operators

TRAINERS

Andrin Raj is the SEA Regional Director for the International Association for Counterterrorism and Security Professionals, Southeast Asia and the Director for the Nordic Counter Terrorism Network, based in Finland. Andrin is also the Adviser to the Federal Government of the Republic of Somalia on terrorism and the prevention and countering of violent extremism. Andrin is a subject matter expert at the European Law Enforcement Training Agency (CEPOL) and also been a subject matter expert for the US Department of Justice in counter terrorism. He is currently also an expert at the EU Knowledge Hub on the prevention and countering of violent extremism. He has previously served as an expert trainer for MARSEC COE, Turkey for NATO allied navies and coast guard on countering piracy and terrorism in the SEA region. Andrin has previously served with the Ministry of Defense Malaysia as Train the Trainers in the first roll out of the National Service Defense program and lectured on crisis management, terrorism, critical infrastructure protection, maritime security at the Institute for Diplomacy and Foreign Affairs Malaysia. Andrin also taught at the University of Indonesia in the Terrorism Studies Program as well as in Monash University, Malaysia campus on International Relations. Andrin has been involved in training the Royal Malaysian Airforce, Special Forces Unit on counter terrorism as well as the UNIFIL Malaysia to Lebanon. He currently works with law enforcement agencies and foreign militaries globally in counter terrorism and defense and security operations.

Vergheese Thirumala is the founder and Managing Director of Maxitulin (est. 1997, Kuala Lumpur) and Maxsecon. The ISO 9001:2015 UKAS certified company operates accross Indonesia, the Philippines, India, Brunei and Cambodia. He serves as Deputy Director for IACSP (SE Asia), Chairman of MLAPN, Ambassador for TAPA TiS and is an active member of both TAPA Risk Compliance Development and JASCO - Joint Action Security Council. With over 30 years of experience in physical security system design, integration and anti terrorism operation, he has led major security initiatives across Malaysia, India, the Philippines, Indonesia, and Saudi Arabi. His deep industry knowledge has driven the development of Deep Learning AI powered solutions that modernize physical security into efficient, digitalized systems. His regional expertise offers critical insights into emerging threats, enabling effective risk mitigation through advanced security strategies.
